

Progress of robots installation in 1st month

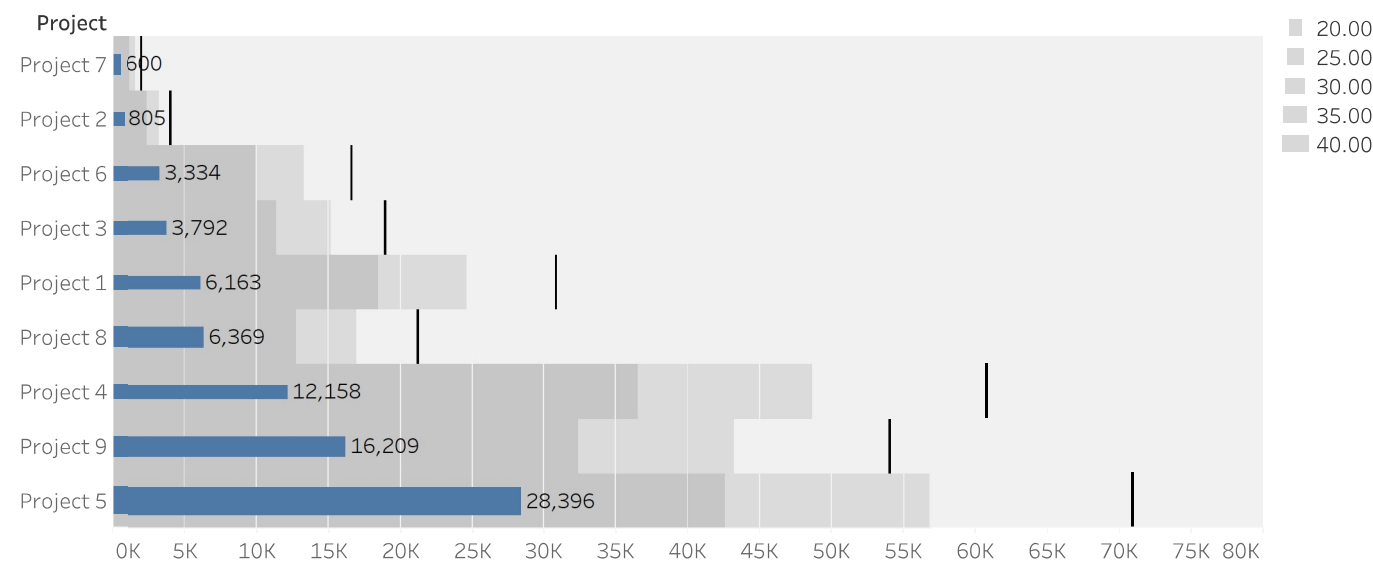

Progress of Shelves for 1st month

# Shelves Installed - Actual, # Shelves Installed - 1st month Plan and Total # Shelves for each Project. Color shows details about # Shelves Installed - Actual, # Shelves Installed - 1st month Plan and Total # Shelves. The marks are labeled by # Shelves Installed - Actual, # Shelves Installed - 1st month Plan and Total # Shelves. The view is filtered on Project, sum of # Shelves Installed - Actual, sum of # Shelves Installed - 1st month Plan and sum of Total # Shelves. The Project filter keeps 9 of 9 members. The sum of # Shelves Installed - Actual filter keeps all values. The sum of # Shelves Installed - 1st month Plan filter keeps all values. The sum of Total # Shelves filter keeps all values.

Utilization of budget in each project

Sum of Budget - Actual for each Project. Size shows sum of % budget used. The marks are labeled by sum of Budget - Actual. The view is filtered on Project, sum of Budget - Actual, sum of Total Budget and sum of % budget used. The Project filter keeps 9 of 9 members. The sum of Budget - Actual filter keeps all values. The sum of Total Budget filter keeps all values. The sum of % budget used filter keeps all values.

# Projects that violated the acceptable defect rate for robot installation

Project and sum of # Defective Robots. Color shows details about Current rate of defective robot installation. Size shows sum of # Defective Robots. The marks are labeled by Project and sum of # Defective Robots. The view is filtered on Project, Current rate of defective robot installation and sum of # Defective Robots. The Project filter keeps 9 of 9 members. The Current rate of defective robot installation filter keeps Less than 1% and More than 1%. The sum of # Defective Robots filter keeps all values.

# Projects that violated the acceptable defect rate for robot installation

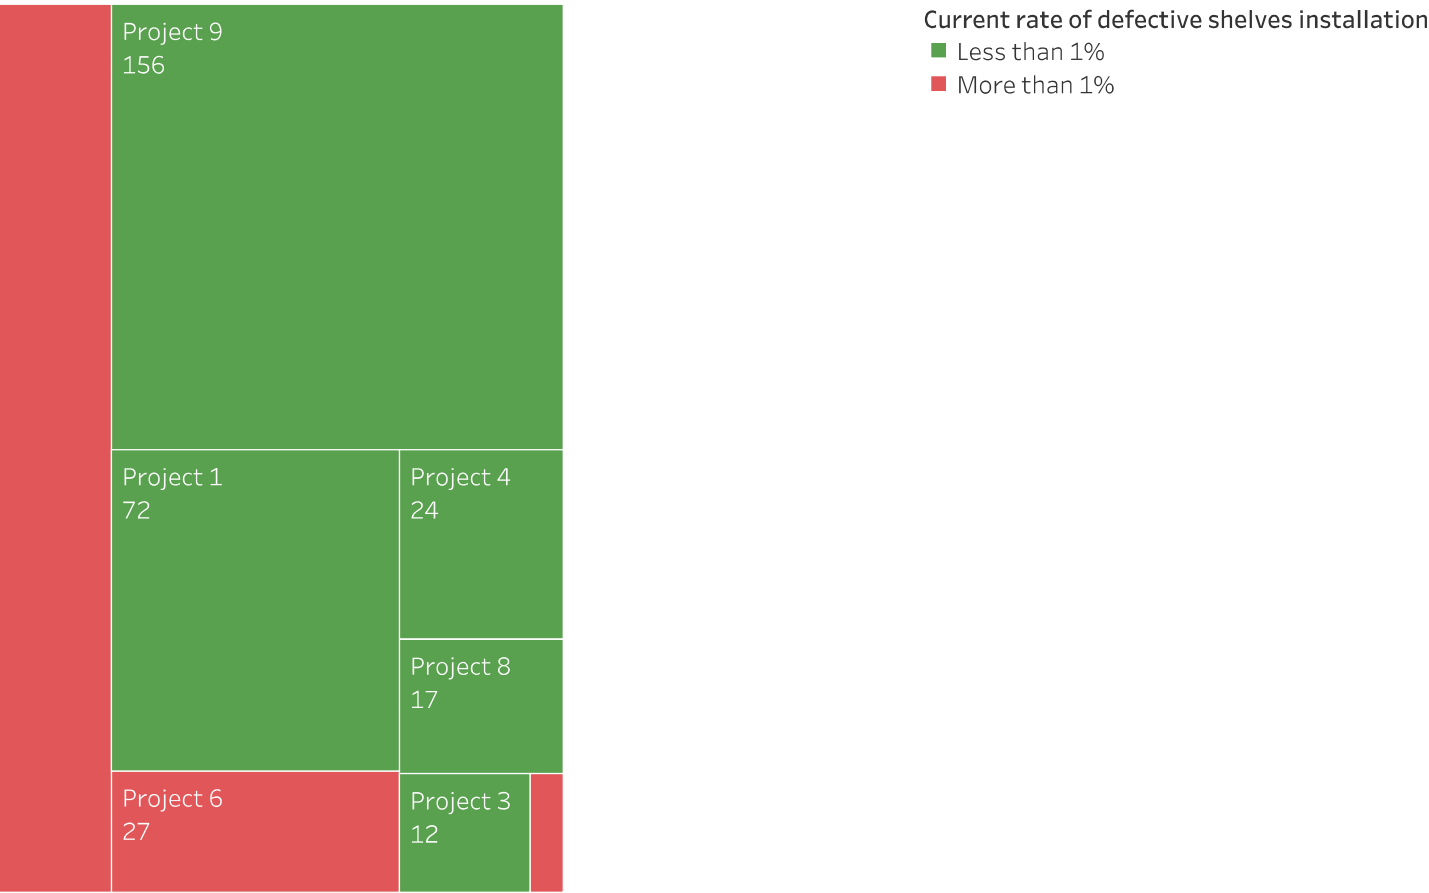

Project and sum of # Defective Robots. Color shows details about Current rate of defective robot installation. Size shows sum of # Defective Robots. The marks are labeled by Project and sum of # Defective Robots. The view is filtered on Project, Current rate of defective robot installation and sum of # Defective Robots. The Project filter keeps 9 of 9 members. The Current rate of defective robot installation filter keeps Less than 1% and More than 1%. The sum of # Defective Robots filter keeps all values.

# Projects that violated acceptable defect rate for shelves installation.

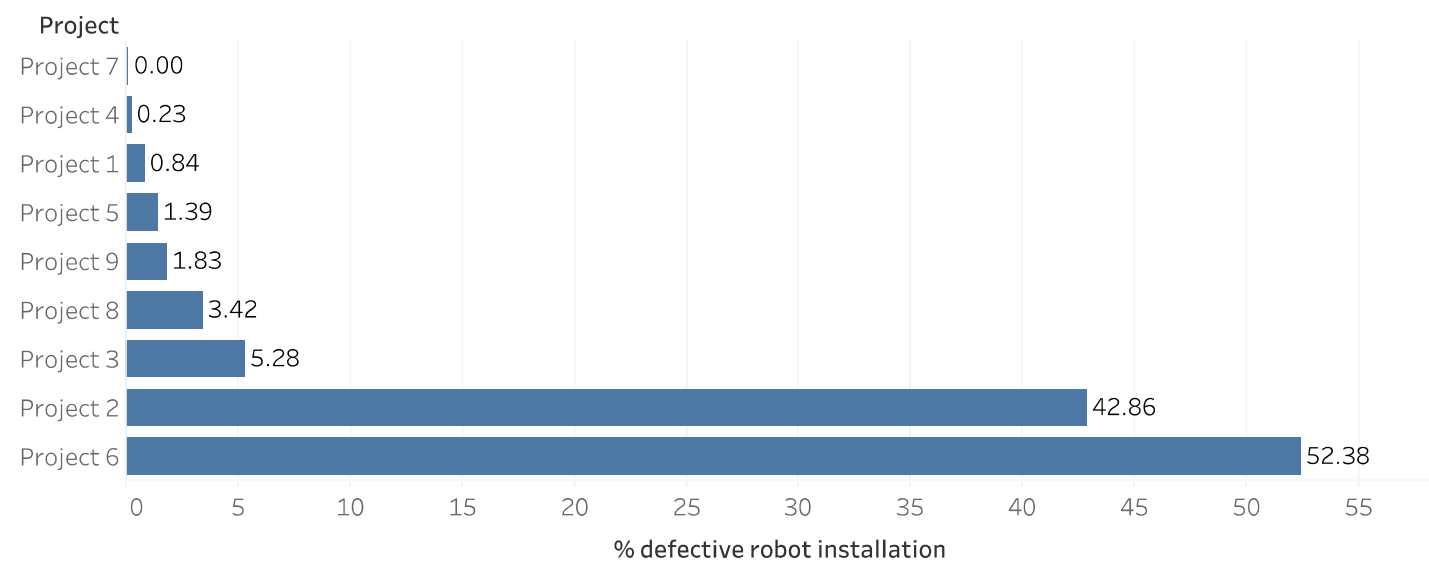

Project and sum of # Defective Shelves. Color shows details about Current rate of defective shelves installation. Size shows sum of # Defective Shelves. The marks are labeled by Project and sum of # Defective Shelves. The view is filtered on Project, Current rate of defective shelves installation and sum of # Defective Shelves. The Project filter keeps 9 of 9 members. The Current rate of defective shelves installation filter keeps Less than 1% and More than 1%. The sum of # Defective Shelves filter keeps all values.

# Projects that violated acceptable defect rate for shelves installation.

Project and sum of # Defective Shelves. Color shows details about Current rate of defective shelves installation. Size shows sum of # Defective Shelves. The marks are labeled by Project and sum of # Defective Shelves. The view is filtered on Project, Current rate of defective shelves installation and sum of # Defective Shelves. The Project filter keeps 9 of 9 members. The Current rate of defective shelves installation filter keeps Less than 1% and More than 1%. The sum of # Defective Shelves filter keeps all values.

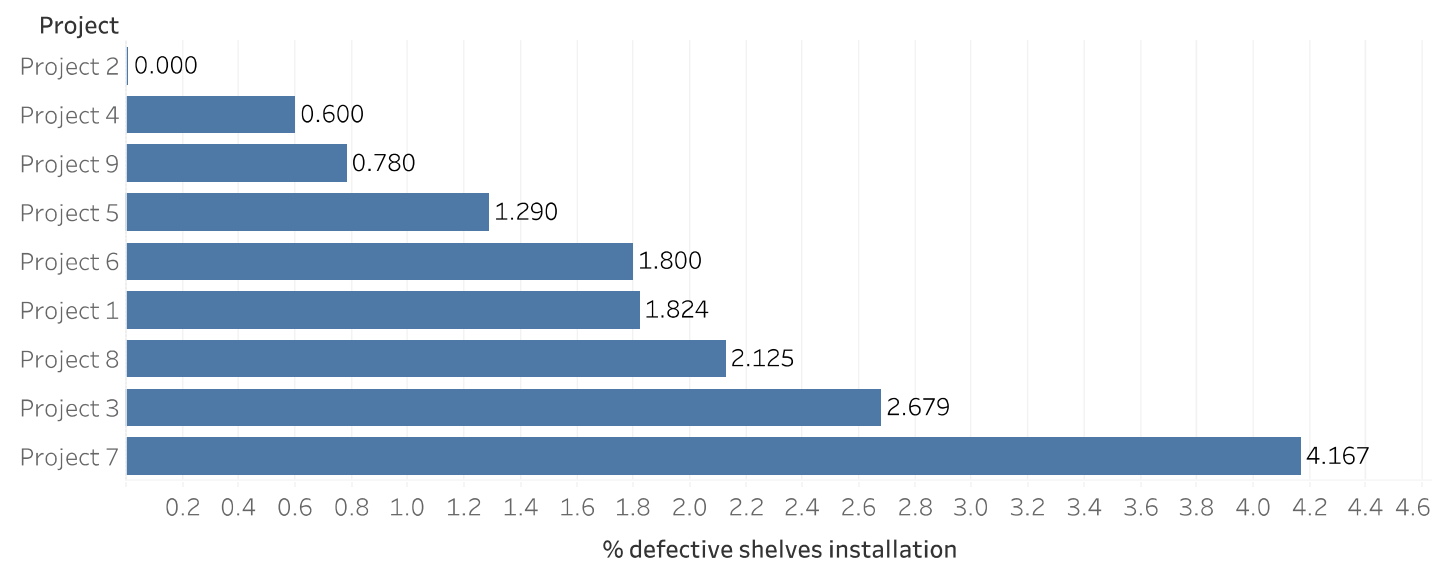

# Percentage defective robot installation

Sum of % defective robot installation for each Project. The marks are labeled by sum of % defective robot installation. The view is filtered on Project and sum of % defective robot installation. The Project filter keeps 9 of 9 members. The sum of % defective robot installation filter keeps all values.

# Percentage defective shelves installation

Sum of % defective shelves installation for each Project. The marks are labeled by sum of % defective shelves installation. The view is filtered on Project and sum of % defective shelves installation. The Project filter keeps 9 of 9 members. The sum of % defective shelves installation filter keeps all values.

## Performance Analysis of Projects

Project	% defective robot i..	% defective shelve..	% budget used	% 1st month plan ..	%1st month plan c..
Project 1	0.8	1.8	20.0	149.1	108.0
Project 4	0.2	0.6	20.0	50.0	95.6
Project 9	1.8	0.8	30.0	28.5	40.0

In this sheet I did an analysis in order to find out which project was the most effective at the end of the first month. I calculated the 7 parameters as shown in the sheet.

The best project would be Project 1 it did not violate the 1% limit on defective rate and also has a low value on percentage defective installation of shelves(1.8%) and robots(0.8%). The project 1 has the best completion rate of 1st month plan for robots (149.1%) and shelves(108%). The project 1 achieves this feat with lowest utilization of budget (20%). Thus, project 1 is the most effective project.
